

Panel Discussion

Empowering Women Entrepreneurs During COVID-19

Women are very important in the business industry. Unfortunately, there haven't been many female entrepreneurs because of the lack of support, which ultimately makes it difficult for a female entrepreneur to survive, especially during the pandemic.

COVID-19 has impacted entrepreneurs in unimaginable ways. It has an even greater impact on female entrepreneurs as they have greater barriers to entry compared to their male counterparts. Trying to stay afloat during these times can be very challenging for women as they are underrepresented. Investing portfolios usually include very few female founders and presumably, women will find it more difficult to fund their ventures during the pandemic.

Woman entrepreneurs need us now more than ever, that's why we've brought in top female experts to help you learn why women-led ventures will be the backbone of recovery as we move along in the pandemic. This panel will give you the confidence to face any challenges with advice, knowledge, tools and tips from top female entrepreneurs in the industry.

Panel duration: 45 minutes
